

DUAL-CAPSULE, PILL-WITHIN-A-PILL TECHNOLOGY

Introducing the world's most advanced new dual-capsule technology that harnesses the power of a super-concentrated, micronized powder capsule suspended within a highly bioavailable liquid capsule. The rapid-release liquid is isolated from the micronized powder, separating the ingredients in their most stable inherent states until the moment of absorption! This advanced technology overcomes the limitations of outdated liquid and powder pills by synergizing two capsules in one. It's technology meeting efficacy without compromise.

TECHNOLOGY MEETS EFFICACY WITHOUT COMPROMISE

ADVANCED DUAL-CAPSULE TECHNOLOGY

Backed by multiple scientific studies, the key ingredients in Clear Muscle™ SX7® Revolution have been shown to build more muscle than any other sport nutrition supplement. The inner pill harnesses a high-quality combination of key musclebuilding ingredients in their inherent active states. It's suspended in a bioavailable liquid complex featuring BetaTOR®. Together they form the most powerful combination of musclebuilding and performance-enhancing ingredients ever assembled into one product. Featuring BetaTOR®, PEAK ATP® and KIC in a combination that's 100% exclusive to MuscleTech, this cutting-edge technology allows for both fast-release liquid and rapid-dispersion powder co-release when you need it most!

FAST-RELEASE LIQUID PILL

Featuring BetaTOR®, a unique, cutting-edge metabolite and free-acid derivative of leucine and HMB. In a groundbreaking clinical study at an American university, test subjects using PEAK ATP® and BetaTOR® gained 18.7 lbs. of pure, lean muscle in just 12 weeks. They also added almost 212 lbs. to their best bench/deadlift/squat total!*

MICRONIZED MUSCLEBUILDING PILL

First-of-its-kind pill, combining PEAK ATP® and KIC, scientifically shown to improve muscle performance, pumps and recovery, while creating the ideal anabolic environment.*

ADVANCED DUAL-CAPSULE TECHNOLOGY

Breakthrough dual-capsule technology combines and delivers ingredients in their inherent active states in one high-potency dose.
